

# Low Voltage Switchgear - 2000A Rated

This low voltage switchgear is designed for power distribution and control in industrial and commercial applications. It is rated up to 2000A with a short-circuit withstand capacity of up to 50kA and complies with IEC standards.

## Overview

### Industrial Power Distribution Solution

This low voltage switchgear is engineered for robust power distribution and control in demanding industrial and commercial environments. Featuring a modular construction and withdrawable circuit breakers, it offers both flexibility and ease of maintenance for critical infrastructure. The system is fully integrated with advanced monitoring and protection devices, ensuring reliable and safe operation under load.

## Technical Specifications

### Rated Current

**2000 A**

Rated Current

### Short-Circuit Withstand Capacity

50 kA

## Compliance & Standards

### Standards Compliance

IEC Standards

## Design Features

### Key Features

- Modular construction
- Withdrawable circuit breakers
- Integrated monitoring devices
- Integrated protection devices

### Suitable Applications

Industrial • Commercial • Critical Power Systems
