

Lowboy Trailer for Construction Machinery

This heavy-duty lowboy trailer is designed for transporting construction machinery. It features hydraulic ramps for easy loading and unloading, along with tandem axles and air brakes for safe operation.

Product Overview

Heavy-Duty Transport Solution

This lowboy trailer is engineered specifically for the efficient transport of heavy construction machinery, including loaders, excavators, and bulldozers. Built with a robust steel frame and equipped with hydraulic ramps, it ensures safe and streamlined loading and unloading processes. Designed for reliability, it features tandem axles and air brakes, making it an ideal choice for hauling oversized equipment across both highways and construction sites.

Technical Specifications

Frame Material	Robust Steel
Loading System	Hydraulic Ramps
Braking System	Air Brakes
Axle Configuration	Tandem Axles

Features

Suitable Cargo

Loaders • Excavators • Bulldozers • Oversized Equipment

Safety & Security

Multiple tie-down points, Air brakes, Hydraulic ramps
