

Lowboy Trailer for Heavy Equipment Transport

This lowboy trailer is designed for transporting heavy equipment and machinery. It features a flatbed platform, multiple axles for weight distribution, and a gooseneck hitch for connection to a tractor unit.

Overview

Heavy-Duty Transport Solution

This lowboy trailer is professionally engineered for the secure transport of heavy machinery and oversized construction equipment. Built with a robust steel framework, it ensures superior durability and reliable load-bearing capacity for demanding logistics operations. The design features a stable flatbed platform and a specialized gooseneck hitch, providing optimal weight distribution and easy connectivity to your tractor units.

Technical Specifications
