

LPG Dispenser for Gas Stations

LPG dispenser designed for accurate and safe dispensing of liquefied petroleum gas. It is suitable for use in gas stations and industrial applications.

Overview

Professional LPG Dispensing Solution

This LPG dispenser is engineered for the precise and safe transfer of liquefied petroleum gas in commercial gas stations and industrial environments. It features robust construction to withstand heavy-duty usage and includes an integrated electronic display for clear monitoring of volume and transaction pricing. Designed with advanced safety protocols, the unit effectively prevents leaks and overfilling to ensure operational reliability.

Key Features

Safety Mechanisms	Leak Prevention, Overfill Protection, Robust Construction
Display Interface	Electronic display for volume and price

Applications

Recommended Applications

- Retail Gas Stations
- Industrial LPG Filling
- Commercial Fueling Facilities
