

LPG/NG Engine (196-369cc, 5.2-10.4HP)

This LPG/NG engine is available in 196cc, 208cc, and 369cc sizes, delivering 5.2HP to 10.4HP. It is engineered for efficient and reliable performance when fueled by either Liquefied Petroleum Gas (LPG) or Natural Gas (NG).

Overview

Versatile LPG/NG Engine Series

This series of versatile engines is specifically engineered for reliable power generation across a variety of applications, including water pumps and portable power equipment. Designed to operate efficiently on either Liquefied Petroleum Gas (LPG) or Natural Gas (NG), these engines offer a flexible and robust power solution. With three distinct displacement and power configurations available, they cater to diverse operational requirements while maintaining ease of maintenance and durable construction.

Technical Specifications

Engine Configurations

Displacement	Power Output
196cc	5.2 HP
208cc	5.6 HP
369cc	10.4 HP

Compatible Fuel Types

LPG, Natural Gas (NG)

Applications

Common Applications

- Power Generators
- Water Pumps
- Portable Power Equipment

Performance

Power Range

5.2 HP

Minimum Power

10.4 HP

Maximum Power
