

M5X130 Hydraulic Motor Cylinder

This hydraulic motor cylinder is the M5X130 model. It is a key component in hydraulic systems, suitable for heavy machinery.

Product Overview

M5X130 Hydraulic Motor Cylinder

The M5X130 hydraulic motor cylinder is a precision-engineered component designed for high-performance hydraulic systems. Featuring a multi-piston design, this unit ensures efficient power transfer and reliable operation in demanding industrial applications. Its robust construction makes it an ideal solution for heavy machinery requiring consistent torque and durability.

Technical Details

Primary Applications

- Heavy machinery
- Industrial hydraulic systems
- Power transmission equipment

Model Number	M5X130
Design Features	Multi-piston design, Splined hub, High-pressure porting
