Product Overview

Efficient Wastewater Management

This macerating sewage pump is engineered for reliable performance in both residential and commercial settings where gravity drainage is not feasible. It effectively grinds and pumps sewage and wastewater from toilets, sinks, and showers, allowing for installation in basements or locations remote from the main sewer line. The system features a robust motor and a durable macerating blade system to ensure clean and hygienic disposal.

Performance Metrics

Performance Data

Head (m)	Flow Rate (m³/h)
1	37
3	33
5	26
7	20
9	15
11	10
13	1

Control Features

Automatic Mode, Manual Mode, Control Panel Interface

Technical Specifications

Suitable Applications

- Toilets
- Sinks
- Showers
- Residential Buildings
- Commercial Installations
- Basement Drainage

Included Components

- Macerating Pump Unit
- Storage Tank
- Installation Fittings
- Control Panel
