

Magnetic Centrifugal Pump for Fluid Transfer

This magnetic centrifugal pump is designed for efficient and reliable fluid transfer. The pump features a magnetically driven impeller, which eliminates the need for a mechanical seal and reduces the risk of leakage.

Product Overview

IMC Series Magnetic Centrifugal Pump

The IMC series magnetic centrifugal pump is engineered for efficient and reliable fluid transfer across diverse industrial environments. By utilizing a magnetically driven impeller, the design eliminates the need for mechanical seals, significantly reducing leakage risks. This pump is specifically built to handle corrosive, abrasive, and high-purity fluids with ease. Its compact construction ensures a long service life and minimal maintenance requirements, making it an ideal solution for operations demanding consistent, leak-free performance.

Technical Features

Drive Mechanism	Magnetic drive (seal-less)
Pump Type	Centrifugal

Application Suitability

Fluid Compatibility	Corrosive, Abrasive, High-purity
---------------------	----------------------------------

Design Benefits

Key Advantages

- Leak-free operation
- Compact design
- Easy maintenance
- Long service life
- Consistent flow rate
