

Magnetic Mounting Bracket

This magnetic mounting bracket allows for secure mounting of devices to metallic surfaces. It features a robust magnetic attachment and adjustable receiver for easy device removal.

Product Overview

Versatile Magnetic Mounting Solution

This professional-grade magnetic mounting bracket provides a robust and reliable way to secure laser devices to metallic surfaces. Engineered for flexibility, the rotational L-bracket design allows for precise positioning to ensure your tools are always where you need them. The intuitive construction supports both individual and combined mounting configurations for enhanced workflow efficiency.

Technical Features

Installation Options

- Individual wall or magnetic object mounting
- Combined multi-bracket setup
- Rotational L-bracket mechanism

Key Advantages

Easy installation • Adjustable positioning • Secure magnetic attachment

Construction Materials

High-strength plastic, Metal plate components
