

Magnetic Starter for Motor Control

This magnetic starter is designed for reliable motor control in industrial applications. It provides overload protection and ensures efficient operation of electric motors.

Product Overview

Industrial Motor Control Solution

The Magnetic Starter is designed for reliable motor control in demanding industrial applications. It features a robust enclosure with clearly marked start and stop buttons, ensuring both ease of use and operational safety. This unit provides essential overload protection, facilitating the efficient and dependable operation of electric motors in various machinery and industrial settings.

Technical Features

Protection

Overload Protection

Suitable Environments

- Industrial machinery
- Motor control systems
- General industrial settings

Interface

Start Button, Stop Button, Manual Control
