Overview

Comprehensive Maize Processing Solution

This industrial maize processing line offers a complete, turnkey solution for milling maize into high-quality flour, grits, and bran. Designed for commercial-scale operations, the system integrates cleaning, milling, and separation units to ensure consistent output and high efficiency. The modular design supports varying production capacities, making it a reliable choice for large-scale food production facilities.

Technical Specifications

Production Capacity

5 T/24H

Minimum Capacity

500 T/24H

Maximum Capacity

Processing Stages

- Cleaning
- Milling
- Separating
- Grading

Output Products

Maize Flour, Maize Grits, Maize Bran

Service & Support

Turnkey Services

- Special Design
- Installation
- Commissioning
- Worker Training

Warranty & Support

Service Type	Details
Spare Parts	1 Year Free
Quality Guarantee	1 Year
Maintenance	Lifelong Service
