

# Malleable Iron C-Clamp

This malleable iron C-clamp is designed for various clamping applications. The clamp features a sturdy iron frame and a threaded spindle with a swivel pad for even pressure distribution.

## ADDITIONAL IMAGES

## Product Overview

### Professional Malleable Iron C-Clamp

This traditional C-clamp is engineered for reliability in demanding woodworking and metalworking environments. Constructed with a robust malleable iron frame and a high-strength carbon steel spindle, it ensures consistent pressure and durability. Featuring a swivel pad for even force distribution, this clamp is an essential tool for secure holding during assembly, gluing, and fabrication tasks.

## Technical Specifications

Frame Material	Malleable Iron
Spindle Material	Carbon Steel
Primary Applications	Woodworking, Metalworking, General Clamping, Assembly, Fabrication

## Product Features

### Key Features

- Durable malleable iron frame construction
- Smooth-running carbon steel spindle
- Swivel pad for even pressure distribution
- Traditional duty-level design

### Market Suitability

DIY • Wood Working
