

Manual Chain Hoist

This chain hoist is a manually operated lifting device designed for vertical lifting applications. It utilizes a robust chain mechanism for reliable and safe lifting.

Overview

Professional Manual Lifting Solution

The HSZ80-CZ manual chain hoist is a heavy-duty lifting device engineered for reliable vertical load management in demanding industrial settings. Constructed from high-strength steel, this hoist ensures durability and long-lasting performance in workshops, construction sites, and warehouses. It features an integrated safety mechanism to prevent overloading, providing essential security for operators during daily lifting tasks.

Technical Specifications

Construction Material	High-strength steel
Operation Type	Manual
Safety Features	Overload Protection, Manual Safety Mechanism

Applications

Common Use Cases

- Workshops
- Construction Sites
- Warehouses
