

Manual Chain Hoist

This manual chain hoist is a robust lifting device designed for various industrial and agricultural applications. Featuring a durable construction, this chain hoist ensures safe and efficient lifting operations.

Product Overview

Industrial-Grade Manual Chain Hoist

This HS-type chain block is engineered for demanding industrial and agricultural lifting tasks. Constructed with high-quality steel and heat-treated components, it offers exceptional durability and strength. The hoist features a compact design for easy maneuverability and a mechanical brake system to ensure secure load holding and precise control during operation.

Technical Specifications

Rated Capacity

1000 kg
Capacity

1500 kg
Test Load

Lift Height	3 m
Gross Weight	10.5 kg

Construction & Materials

Material Composition

Component	Material
Hooks	35CrMo Alloy Steel
Gears	20CrMnTi Alloy Steel

Key Construction Features

- High-strength hollow structure design
- Heat-treated major components
- German-engineered load chain
- Cast safety latches

Compliance & Safety

Safety Features	Mechanical Brake System, Safety Latches, Heat-Treated Components
