

Manual Dispense Airpot

This manual dispense airpot requires no electricity, making it perfect for serving hot beverages anywhere. It features an automatic dispense button for easy access to hot water.

Overview

Efficient Hot Water Dispensing

The Manual Dispense Airpot is designed for reliable, high-capacity hot water service in office or catering environments. Featuring a generous 4.0L capacity and an integrated keep-warm function, this unit ensures hot water is available whenever needed. The intuitive design includes a clear water level indicator for easy monitoring and a simple manual dispensing button for controlled pouring.
