Overview

Manual Guillotine Shear

This manual guillotine shear is designed for precise and efficient metal cutting in industrial and workshop environments. It features a robust steel plate construction for durability and stability during operation. Equipped with a fast clamping device and an adjustable back gauge, it ensures accurate material positioning and clean cuts for various sheet metal tasks.

Technical Specifications

Bed Width	1250 mm
Max. Shearing Thickness	1 mm
Table Height	750 mm
Construction Material	Steel plate
