

Manual Hydraulic Pallet Stacker 1000 kg

This manual hydraulic stacker is designed for lifting and transporting pallets. It has a lifting capacity of 1000 kg and a maximum lifting height of 1500 mm.

Overview

Versatile Material Handling Solution

The manual hydraulic stacker is a robust material handling tool designed for efficient lifting and transportation of pallets in warehouses, factories, and workshops. Featuring a durable steel frame and a precise hydraulic lifting mechanism, it offers reliable performance for daily operations. Its compact design and adjustable forks ensure excellent maneuverability in tight spaces while accommodating various pallet sizes.
