

# Manual Lathe Machine with 300mm Gap Length

This manual lathe machine is suitable for motorcycle wheel processing due to its 300mm gap length and 520mm swing over gap. It features a 4-handle gearbox and V-way bedways that are induction hardened and ground.

## ADDITIONAL IMAGES

## Overview

### Precision Manual Lathe

This manual lathe machine is a robust metalworking tool engineered for high-precision turning, facing, threading, and drilling operations. Featuring a rigid bed construction and an integrated coolant system, it ensures stability and optimal thermal management during intensive machining tasks. Designed for versatility and operator safety, this machine includes variable spindle speeds and a protective shield, making it an ideal solution for professional workshops requiring consistent accuracy.

## Technical Specifications

### Spindle Speed Range

- 130
- 210
- 380
- 460
- 790
- 940
- 1300
- 1500

Gap Length	300 mm
Swing Over Bed	260 mm

## Features & Capabilities

### Safety Equipment

Emergency Stop • Transparent Chip Shield • Jog Function

### Included Components

- Chuck
- Tool Post
- Tailstock
- Coolant System with Flexible Nozzle
- Lead Screw
- Storage Cabinets

### Supported Operations

Turning, Facing, Threading, Drilling
