

Manual Lever Block Hoist

This manual lever block hoist is designed for heavy-duty lifting in industrial environments. It features a high-strength alloy steel body, a precision-machined gear system, and a safety latch on the hook.

Overview

Heavy-Duty Manual Lever Block

The HSH-A Manual Lever Block is a robust lifting device engineered for demanding industrial environments, including construction, manufacturing, and mining. It features high-strength alloy steel construction with a corrosion-resistant powder-coated finish for long-term durability. Designed for precision, it utilizes a machined gear system for smooth load control, while its compact, lightweight frame ensures ease of use in confined spaces.

Technical Specifications

Body Material	High-strength alloy steel
Finish	Powder-coated
Rope Material	High tensile steel

Safety & Features

Compliance

Industry Standard Compliant

Safety Features

Safety latch hook, Corrosion resistant, Precision-machined gears

Usage

Typical Applications

- Construction
- Manufacturing
- Mining
- Lifting and pulling
- Load positioning
