

Manual Pallet Jack for Material Handling

This manual pallet jack is essential for lifting and moving pallets. It is equipped with a handle, wheels, and forks for efficient operation in warehouses and factories.

Overview

Manual Pallet Jack

This manual pallet jack is a robust and efficient solution for material handling in warehouses, factories, and industrial logistics environments. Designed for ease of use, it features a reliable manual control mechanism and durable polyurethane wheels to ensure smooth maneuverability. With a high load capacity and precision-engineered fork dimensions, it provides a stable and safe method for transporting palletized goods.

Technical Specifications

Fork Dimensions

Dimension	Value (mm)
Fork Length	1150
Fork Width	550
Min. Fork Height	85
Max. Fork Height	200

Overall Dimensions

1550 mm
Overall Length

1270 mm
Turning Radius

Load Capacity 2000 kg

Construction

Wheel Material	Polyurethane, Double Wheel
Net Weight	75 kg
