

Manual Wood Saw with Riveted Handle

This hand saw is designed for manual cutting of wood and other materials. The blade is made of metal and has a tapered shape, widening towards the handle for stability and control.

Product Overview

Professional Manual Wood Saw

This manual wood saw is engineered for precision and durability in woodworking tasks. Featuring a robust metal blade with a tapered design, it offers enhanced stability and control during operation. The ergonomic wooden handle is securely fastened with three rivets, ensuring long-term reliability for professional use.
