

Marine Chartplotter with Color Display

This chartplotter is designed for marine navigation. It features a high-resolution color display and supports various chart formats, GPS positioning, route planning, and waypoint management.

Product Overview

Professional Marine Navigation System

This high-performance marine chartplotter features a brilliant 15-inch active matrix color LCD display designed for excellent visibility in daylight conditions. Equipped with an ultra-fast processor, it delivers instant screen changes for efficient navigation in demanding marine environments. The system provides precise GPS WAAS positioning accuracy, ensuring your vessel stays within 3 meters of your waypoint in most situations.

Display Specifications
