

Marine Deck Machinery for Lifting and Pulling

Heavy-duty deck machinery designed for marine applications with a robust construction. It is suitable for lifting and pulling operations on ships or offshore platforms.

Overview

Heavy-Duty Marine Deck Machinery

This professional-grade deck machinery is engineered specifically for demanding marine and offshore environments. Featuring a robust, heavy-duty construction, it is designed to withstand harsh conditions while providing reliable lifting and pulling performance. The large-capacity spool system ensures efficient cable or rope winding, making it an essential solution for shipboard operations and offshore platform logistics.

Technical Specifications

Build Quality

Heavy-duty • Robust Construction • Corrosion Resistant

Operational Features

- Large spool capacity
- High-torque winding
- Maritime-grade durability

Primary Application

Marine, Offshore, Lifting, Pulling
