

Marine Grade Alloy Steel Shackle

This high-strength shackle is designed for shipbuilding and marine applications. Constructed from durable alloy steel, this shackle provides a secure and reliable connection for lifting, towing, and rigging operations in harsh marine environments.

Product Overview

High-Performance Marine Shackle

This high-strength alloy steel shackle is specifically engineered for demanding shipbuilding and marine environments. It provides a secure connection for critical lifting, towing, and rigging operations, ensuring maximum performance under pressure. Designed for versatility, it integrates seamlessly with chains and wire ropes to deliver reliability in offshore applications.

Technical Details

Material	Alloy Steel
Fastening Mechanism	Screw Pin

Applications

Compatibility

- Chains
- Wire ropes
- General rigging hardware

Primary Applications	Shipbuilding, Offshore, Marine, Rigging
