

Marine Hardware Components

These are cast metal hardware components designed for marine or boating applications. The hardware includes brackets with cylindrical receivers, support brackets, and brackets with rounded receivers, all featuring mounting holes.

Product Overview

Professional Marine Hardware

These high-quality cast metal hardware components are engineered specifically for demanding marine and boating environments. The set includes versatile mounting brackets designed with secure attachment points, ensuring structural integrity and reliability. Ideal for various marine applications, these components offer robust support and precise fitment for essential hardware installations.

Technical Specifications

Included Components

- Bracket with cylindrical receiver
- Support bracket with central hole
- Bracket with rounded receiver

Application Suitability

Marine • Boating • General Hardware

Material	Cast Metal
Mounting Features	Pre-drilled mounting holes, Secure attachment points
