

Marine Horizontal Centrifugal Pump for Fluid Transfer

This horizontal centrifugal pump is designed for marine applications. It is suitable for fluid transfer systems.

Product Overview

Marine Horizontal Centrifugal Pump

The CIS series horizontal centrifugal pump is engineered for reliable fluid transfer in demanding marine environments. Designed for versatility, this unit is suitable for handling fresh water and seawater, making it an ideal choice for fire control, cooling systems, sanitation, and general water supply or drainage. Its robust construction ensures consistent performance across industrial, municipal, and agricultural applications.

Technical Specifications

Common Applications

Fire Control • Cooling Systems • Sanitation • Water Supply • Drainage • Irrigation

Rotation Direction Clockwise (viewed from motor)

Power Supply 380V, 3-Phase, 50Hz

Performance Data

Technical Parameters

Model	Motor Power	Speed
CIS50-32-125	7.5 / 2.2 kW	2900
CIS50-32-160	7.5 kW	2900
CIS50-32-200	7.5 kW	2900
CIS50-32-250	7.5 kW	2900
CIS65-50-160	15 kW	2900
CIS65-40-200	15 kW	2900
