

Marine Multifunction Display

This widescreen multifunction display is designed for marine navigation. It supports GPS, radar, sonar, and video inputs, providing a comprehensive navigation solution.

Product Overview

Commanding Navigation Control

The Marine Multifunction Display redefines navigation with a high-resolution, sunlight-viewable widescreen interface. This versatile unit consolidates GPS, radar, sonar, and video inputs into a single, user-friendly command center. Designed for reliability on boats and yachts, it offers extensive networking capabilities to share data seamlessly across onboard systems.
