

Marine Starting Battery 12V 70Ah

This 12V 70Ah marine battery provides reliable starting power for boats and other marine vehicles. The sealed, maintenance-free design ensures durability and eliminates the need for regular water addition.

Overview

Reliable Marine Power

This 12V 70Ah maintenance-free battery is specifically engineered for marine environments, delivering reliable starting power and consistent performance. Its robust construction provides excellent resistance to vibration and the harsh conditions typical of marine use. The sealed design eliminates the need for regular maintenance, ensuring convenience and dependable operation for boat engines and onboard electronics.

Electrical Specifications

Rated Voltage	12 V
Capacity	70 Ah
Cold Cranking Amps (CCA)	680 A

Features

Maintenance

Maintenance-Free • Sealed Design

Suitable Applications

Marine Engines, Onboard Electronics, Boats
