

Maritime Anchor Chain

This heavy-duty anchor chain is designed for maritime applications. Constructed from high-strength steel, each link is forged and heat-treated to ensure exceptional durability and resistance to wear and corrosion.

Product Overview

Heavy-Duty Maritime Anchor Chain

This high-strength steel anchor chain is engineered for demanding maritime applications, offering exceptional durability and resistance to wear and corrosion. Each link is precision forged and heat-treated to ensure reliable performance when securing vessels in diverse sea conditions. Designed to meet rigorous industry standards for load capacity and safety, this chain provides the stability required for professional marine operations.

Technical Specifications

Material	High-strength steel
Manufacturing	Forged, Heat-treated
Product ID	2010722

Compliance & Quality

Standards

Load Capacity Compliant • Safety Standard Compliant
