Product Overview

Professional Masticating Slow Juicer

This slow juicer utilizes low-speed extrusion technology to minimize heat and oxidation, ensuring your juices retain maximum nutrients and natural enzymes without delamination. Powered by a robust 200W DC copper motor, the unit operates at a quiet 80db, making it an ideal addition to any commercial or home kitchen environment. With an easy-to-clean design and high-quality construction, it provides a consistent, high-yield juicing experience for a variety of fruits and vegetables.
