

Material Cutting and Bending Machine

This cutting and bending machine is engineered for precise and efficient material processing. It includes a robust frame, sliding table, and adjustable cutting depth and angle for diverse material types and shapes.

Product Overview

Professional Material Processing

This versatile cutting and fold-bend machine is engineered for precision and efficiency in industrial workshops. It features a robust, stable frame and a sliding table designed for highly accurate material positioning. With integrated water cooling to manage heat and dust, this machine ensures both extended blade longevity and a safer, cleaner working environment.

Operational Features

Machine Components

- Robust Frame
- Sliding Table
- Powerful Cutting Blade

Cooling System	Yes
Adjustable Parameters	Cutting Depth, Cutting Angle

Safety

Safety Equipment

Blade Guard • Emergency Stop Button
