Overview

Professional Distribution Panel Assembly

This MCCB distribution panel assembly is engineered for reliable power distribution and circuit protection in industrial and commercial environments. Designed to facilitate both incoming and outgoing connections for Molded Case Circuit Breakers, it offers a flexible, customizable configuration to meet specific project requirements. The assembly ensures robust performance and safety, featuring clear phase identification for simplified installation and maintenance.

Technical Specifications

Incoming Current Options

- 250A
- 400A
- 630A

Outgoing Current Options

- 63A
- 125A
- 250A
- 400A

Phase Configuration

3-Phase (3P)

Application

Distribution Box, Industrial, Commercial, Circuit Protection
