

Meat Mincer Motor Gearbox Assembly

This motor and gearbox assembly is designed for meat mincers and similar kitchen appliances. It features a durable construction with optimized gear ratios for efficient meat processing.

ADDITIONAL IMAGES

Product Overview

High-Performance Mincer Drive System

This complete motor and gearbox assembly is engineered for heavy-duty meat mincing and kitchen appliance applications. Featuring a robust AC motor with a wound stator and integrated cooling fan, it ensures reliable thermal management during prolonged operation. The cast metal gearbox housing provides durability, while the optimized gear ratios are designed to deliver the high torque required for efficient meat processing.

Technical Specifications

Suitable Applications

Meat Mincers • Kitchen Appliances • Replacement Part • Upgrade Component

Design Highlights

- High-torque output
- Optimized gear ratios for processing efficiency
- Easy installation design
- Pre-wired electrical leads included

Motor Type

AC Motor

Construction Features

Wound Stator, Laminated Core, Cast Metal Housing, Integrated Cooling Fan
