

Mechanical Power Press for Metal Forming

This heavy-duty mechanical power press is designed for metal forming operations. It features a robust frame, a precision ram, and a control panel for adjusting stroke and pressure.

Overview

Heavy-Duty Metal Forming Solution

This mechanical power press is engineered for high-performance metal forming operations, including punching, blanking, and deep drawing. Built with a robust frame and precision ram control, it offers the stability and accuracy required for demanding industrial environments. The intuitive control panel allows operators to easily adjust stroke and pressure settings, ensuring consistent output and operational efficiency.

Key Specifications

Rated Force

160 Tons
Capacity

Model Number

JZD21-160

Operational Capabilities

Supported Operations

Punching, Blanking, Deep Drawing

Safety Features

Yes

Equipment Details

Design Characteristics

- Robust heavy-duty frame
- Precision ram mechanism
- Adjustable stroke control
- Integrated pressure adjustment panel
