Product Overview

Medical Grade Nebulizer System

This medical compressor nebulizer is designed for efficient, home-based respiratory therapy. Utilizing advanced micron technology, the device converts liquid medication into a fine aerosol mist with a particle size of 3.9 μm for superior absorption. The system features a quiet, oil-free compressor and adjustable fog volume, making it suitable for both adults and children.

Technical Specifications

Particle Size	3.9 μm
Operation Type	Oil-free compressor
Key Features	Adjustable fog volume, Low noise, Low vibration, Medical grade

Included Accessories

Package Contents

- Compressor unit
- Medicine cup
- Adult mask
- Child mask
- Mouthpiece
- Air tube
- Mask strap

Application

Suitable Conditions

Asthma • Cystic Fibrosis • COPD
