

Memory Card and Reader Combo

This combo includes both a memory card and a compatible card reader. It allows users to easily transfer data between memory cards and computers or other devices.

Product Overview

Versatile Monitoring Solution

This wireless pan and tilt camera is designed to provide comprehensive surveillance for monitoring environments. Featuring remote pan and tilt functionality, it offers a wide viewing angle to ensure full coverage. With integrated infrared night vision and two-way audio communication, it allows for clear monitoring and remote interaction even in low-light conditions.
