

Metal Component Disks for Industrial Equipment

These metal component disks are designed for use in industrial equipment. They are stored in wire cages and stacked on wooden pallets within a manufacturing or distribution center.

Product Overview

Industrial-Grade Metal Component Disks

These high-quality metal component disks are precision-engineered for use in heavy industrial equipment and machinery. Designed for durability and consistent performance, these circular components are suitable for a wide range of mechanical applications. They are stored and shipped in bulk, making them an ideal solution for large-scale manufacturing and maintenance requirements.

Component Type	Circular Metal Disks/Rings
Suitability	Industrial Machinery, Heavy Equipment, Mechanical Assemblies

Logistics & Storage

Storage Method

- Wire cages
- Stacked on wooden pallets

Availability

Bulk Ready • In Stock
