

Metal Cut-Off Saw

This cut-off machine is designed for precise and efficient cutting of metal workpieces. It utilizes a high-speed abrasive wheel driven by a powerful motor to ensure clean and accurate cuts.

Product Overview

High-Performance Metal Cutting

The J1G-TM01-355 is a robust power tool engineered for precise and efficient cutting of metal workpieces. Featuring a high-speed abrasive wheel driven by a powerful motor, it ensures clean and accurate cuts across various materials. This machine is an ideal solution for construction, metal fabrication, and professional maintenance applications.

Performance Metrics

Key Performance Metrics

355 mm

Wheel Diameter

Design & Safety

Safety and Stability

- Integrated spark guard for operator protection
- Protective wheel guard to deflect debris
- Sturdy base design to minimize vibration
- Secure clamping system for material stability

Operational Features

Adjustable Fence	Yes
Cutting Capabilities	Precise Angle Cuts, Repeatable Cutting, High-Speed Abrasive Cutting

Applications

Target Industries

Construction • Metal Fabrication • Maintenance
