

Metal Cutting and Bending Machine

This machine is designed for cutting and fold-bending metal sheets. It features a rotating platform and linear guides for precise material handling, suitable for various metal forming applications.

Overview

Professional Metal Processing Solution

This robust metal cutting and bending machine is engineered for precision and versatility in metal forming applications. Featuring a durable construction with a specialized blue finish, it is designed to handle demanding tasks while maintaining ease of use. The unit is equipped with a portable wheel system, allowing for flexible placement within your workshop environment.

Design & Construction

Key Components

- Circular rotating platform
- Linear guides
- Front control panel
- Integrated wheel system

Finish	Blue painted
Mobility	Yes

Operational Capabilities

Control Interface

Front Panel Controls • Indicator Lights

Primary Functions	Metal Cutting, Fold-Bending, Metal Forming
