

Metal Cutting and Bending Machine

This metal forming machine is designed for cutting and fold-bending operations. It features a robust construction with a large worktable and a vertical column supporting a cutting/bending head.

Overview

Industrial Metal Forming Solution

This robust metal cutting and bending machine is engineered for precision fabrication tasks in industrial environments. Featuring a heavy-duty worktable and a stable vertical column design, it provides the necessary support for consistent cutting and fold-bending operations. The integrated control panel allows operators to make precise adjustments, ensuring efficiency and reliability for complex metal forming projects.

Key Features

Capabilities

Metal Cutting, Fold-Bending, Industrial Fabrication

Construction

Construction Type

Heavy-duty vertical column design

Worktable

Large-format industrial worktable

Operation

Control Interface

Yes
