

Metal Cutting and Folding Machine

This cutting and folding machine is designed for precision metal forming. It features a powerful motor, durable cutting wheel, and adjustable guides for accurate cuts and versatile shaping of metal sheets.

Overview

High-Performance Metal Forming Solution

This robust metal cutting and folding machine is engineered for precision and versatility in professional metalworking environments. Designed to handle both cutting and fold-bending tasks, it features a powerful motor and durable components for consistent performance. With adjustable guides and a stable base, this machine ensures accurate shaping of metal sheets and profiles while maintaining safety standards during operation.

Technical Specifications

Key Features

- Powerful motor for heavy-duty operation
- Durable cutting wheel for precision
- Adjustable guides for accurate alignment
- Sturdy base for stability and safety

Ideal Applications

Professional Metalworking • Sheet Metal Fabrication • Industrial Forming

Capabilities

Metal Cutting, Fold-Bending, Sheet Forming, Profile Shaping
