

Metal Cutting and Folding Machine

This precision machine is designed for cutting and folding metal sheets in industrial applications. It features a robust construction and an advanced control system for high cutting accuracy.

Overview

Industrial Metal Processing Solution

This precision metal cutting and fold-bending machine is engineered for demanding industrial applications requiring high accuracy and reliability. Built with a robust construction, it seamlessly integrates shearing and bending operations into a single, efficient workflow. The system features an advanced control interface designed to maximize operator productivity while maintaining strict safety standards.

Technical Specifications

Key Features

- Robust industrial construction
- Advanced control system
- High cutting accuracy
- User-friendly interface
- Integrated safety features

Model Number	SXDKB01000
Capabilities	Metal Cutting, Shearing, Folding, Bending
