

Metal Cutting and Folding Machine

This heavy-duty machine is designed for cutting and folding metal with precision. It features a robust frame and tooling for efficient metal forming operations.

Overview

Industrial Metal Forming Solution

This heavy-duty cutting and fold-bend machine is engineered for high-precision metal forming applications. Featuring a robust frame and an expansive working area, it is designed to handle demanding industrial fabrication tasks with efficiency. The integrated control panel provides operators with precise adjustments and real-time monitoring capabilities, ensuring consistent performance for complex metalworking projects.

Capabilities

Key Performance Features

- Robust frame construction
- Large working area
- Precision cutting tools
- Precision bending tools
- Integrated control panel

Supported Operations

Metal Cutting, Metal Folding, Metal Bending, Metal Forming

Certifications

Standards

Industrial Grade • High Precision
