

Metal Cutting Band Saw Machine

This metal cutting band saw utilizes bimetal blades for efficient material processing. It offers high precision, narrow kerf, and reduced noise compared to traditional saws.

Overview

Heavy-Duty Metal Cutting Solution

This industrial-grade band saw machine is engineered for precision metal cutting applications. It features a robust, heavy-duty frame designed to handle demanding workloads while maintaining cutting accuracy. The machine is equipped with advanced operational features including hydraulic blade tensioning, variable speed control, and an integrated coolant system to prolong blade longevity.

Technical Specifications

Performance Highlights

1000 CH
Model Series

Model Identifier	CH-1000
Key Features	Hydraulic Blade Tensioning, Variable Speed Control, Integrated Coolant System, Material Handling Rollers

Safety & Operation

Safety Mechanisms

- Protective blade guards
- Emergency stop mechanisms
- Red safety cover for moving parts
