

Metal Grinding Abrasive Roll

This metal grinding abrasive roll is designed for demanding industrial applications. It features a durable backing and aggressive abrasive grain for rapid material removal and long life.

Overview

High-Performance Abrasive Roll

The PZ933 is a high-performance metal grinding abrasive roll engineered for demanding industrial applications. It features a durable backing paired with an aggressive abrasive grain, ensuring rapid material removal and extended operational life. This versatile roll is ideal for tasks including grinding, deburring, and surface finishing, with a design that allows for easy dispensing and length customization.

Technical Specifications

Available Grit Sizes

- 40
- A-240
- AZ-240

Key Features

Durable Backing • Aggressive Grain • Easy Dispensing

Model Number	PZ933
Primary Applications	Metal Grinding, Deburring, Surface Finishing
