

Metal Heating Torch with Angled Nozzle

This heating torch is a versatile tool designed for various applications. It features a durable metal construction with a long, angled nozzle for precise heat application.

Product Overview

High-Efficiency Metal Heating Torch

This professional-grade heating torch is engineered for rapid heat generation, making it an essential tool for demanding industrial applications. Designed for safety and ease of use, it offers significant cost-efficiency while maintaining high performance. Its durable construction and angled nozzle design allow for precise heat application in tasks ranging from metalworking to waterproof material construction.

Technical Specifications

Available Nozzle Diameters

- 25mm
- 30mm
- 45mm
- 50mm
- 60mm
- 50mm (with hole)
- 60mm (with hole)

Popular Configurations

Model	Length Options
KT-08-50	500mm, 900mm
KT-05-50 (with hole)	500mm, 900mm

Application & Usage

Primary Applications

Metal Industry, Waterproof Material Construction, Heating, Baking

Features

Key Benefits

Rapid Heating • Cost-Effective • Safe Operation • Durable Construction
