

Metal Hydraulic Shear

This hydraulic shear is designed for precision metal cutting. It features a robust frame, adjustable blade clearance, and a user-friendly control panel, making it suitable for various metal types and thicknesses.

Product Overview

Precision Hydraulic Shearing Solution

The HGO40/6.35 Hydraulic Shear is a robust machine engineered for precision metal cutting across various industrial sectors. It integrates advanced hydraulic and electric systems to ensure reliable performance in applications ranging from automotive manufacturing to electrical cabinet production. Designed for versatility, it handles low-alloy steel, stainless steel, and spring steel with adjustable cutting parameters for optimal results.

Technical Specifications

Model Number	HGO40/6.35
Compatible Materials	Low-alloy steel, Stainless steel, Spring steel, General metal sheets

Key Features

Machine Capabilities

- Adjustable blade clearance
- Hydraulic clamping system
- High-precision cutting
- Robust frame construction
- Integrated safety systems

Recommended Industries

Automotive • Machine-building • Container manufacturing • Electrical cabinets • Light industry
