

Metal Lock Key Blank

This metal key blank is designed for creating new keys or replacing lost ones. The blade has distinct cuts and grooves that correspond to the lock's tumblers.

Product Overview

Professional Metal Key Blank

This high-quality metal key blank is designed for precision lock cutting and duplication. Featuring a durable construction with a circular head and standard grooved blade, it is engineered to interface seamlessly with compatible tumbler lock systems. The inclusion of a keyring hole ensures convenient portability and organization for end-users.
