

# Metal Shaping Hammer with Dual-Purpose Head

This hammer is designed for shaping metal. It features a flat striking face and a chisel-shaped peen, with handle options in wood and synthetic materials for a comfortable grip.

## Product Overview

### Dual-Purpose Metal Shaping Hammer

This versatile metal shaping hammer is engineered for precision and durability in professional metalworking environments. Featuring a dual-purpose head design, it combines a flat striking face for general driving tasks with a chisel-shaped peen for intricate metal shaping and forming. Available in multiple handle configurations, this tool offers a reliable grip and balanced weight distribution to enhance user control and reduce fatigue during extended use.

## Technical Specifications

### Handle Material Options

- Natural Wood
- Synthetic Composite

### Available Model Codes

H0401, H0402, H0403, H0404

### Head Configuration

Dual-purpose (Flat striking face and chisel-shaped peen)

## Performance Metrics

### Primary Applications

Metal Shaping • Chisel Driving • General Fabrication
