

Metal Sheet Cutting and Folding Machine

This machine is designed for cutting and folding metal sheets. Its robust construction ensures reliable performance in demanding applications.

Product Overview

Versatile Metal Processing

This Metal Sheet Cutting and Folding Machine is designed to provide precise and efficient metal fabrication capabilities. It combines cutting and folding functionalities into a single unit, making it an ideal solution for workshops requiring versatility. The robust construction ensures durability and consistent performance for various metal sheet processing tasks.

Technical Specifications

Model Series	WQ/WQD
Functions	Cutting, Folding, Bending
